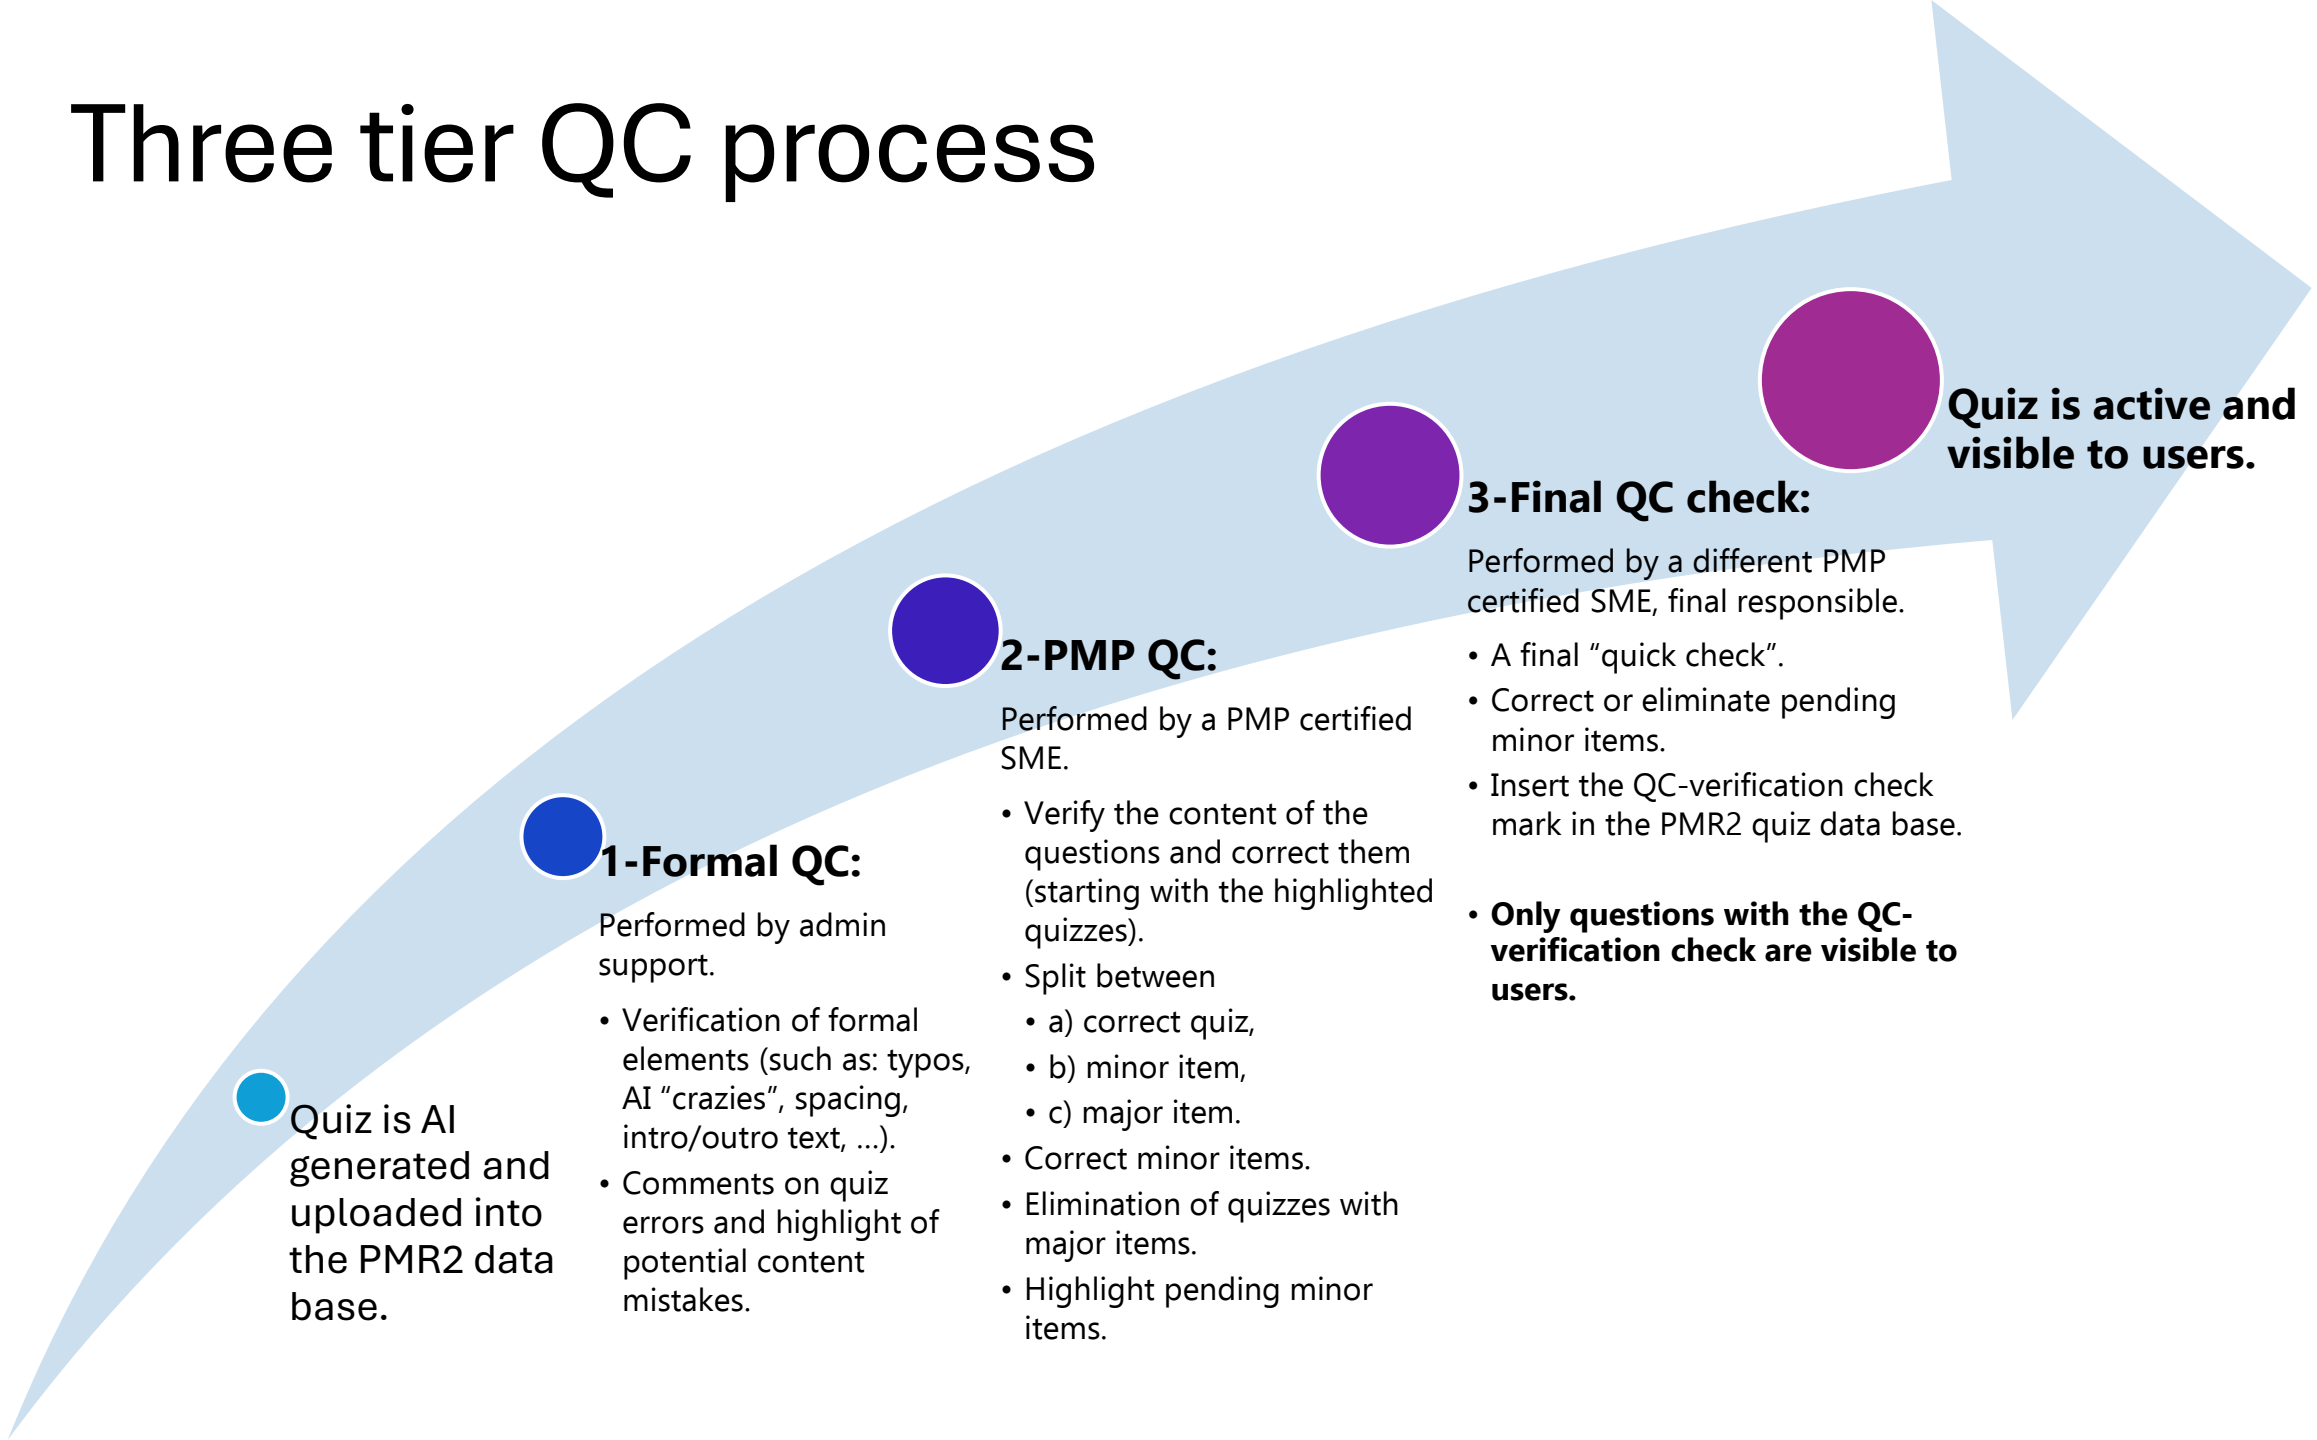
PMR2

July 2024 – Max Langosco

Three tier QC process



Quiz is AI generated and uploaded into the PMR2 data base.

1-Formal QC:

Performed by admin support.

- Verification of formal elements (such as: typos, AI “crazies”, spacing, intro/outro text, …).
- Comments on quiz errors and highlight of potential content mistakes.

2-PMP QC:

Performed by a PMP certified SME.

- Verify the content of the questions and correct them (starting with the highlighted quizzes).
- Split between
  - a) correct quiz,
  - b) minor item,
  - c) major item.
- Correct minor items.
- Elimination of quizzes with major items.
- Highlight pending minor items.

3-Final QC check:

Performed by a different PMP certified SME, final responsible.

- A final “quick check”.
- Correct or eliminate pending minor items.
- Insert the QC-verification check mark in the PMR2 quiz data base.

- **Only questions with the QC-verification check are visible to users.**

Quiz is active and visible to users.
